Beacon
LIGHTING

be comfortable

Your home is your castle and your haven from the elements with everything just the way you like it. To help you create your perfect micro climate we've compiled a range of natural energy saving cooling solutions to stimulate the senses.

Beacon Lighting provides ceiling fans that blend effortlessly into interiors and compliment your style; for a cooling breeze during the day or a gentle flow of fresh air for a restful sleep at night.

Ceiling fans not only help you keep cool in summer, but fans with reverse cycle can also help keep you warm in winter, saving you money on your utility bills all year round. Plus, most ceiling fans use only as much power as a 60 watt light bulb which equates to less than 1 cent per hour to run*.

Providing a soothing, natural circulatory breeze, ceiling fans can make you feel up to 8 degrees cooler and when used in conjunction with your air conditioner, your air conditioning bills can be reduced by as much as 40%.*

Choose a fan to match your décor and help create the statement you want from our extensive range. Let us help you to create your perfect haven today.

* RRP prices shown are correct at the time of printing but are subject to change at any time. For the current RRP, promotional pricing or other offers, please check in store or online www.beaconlighting.com.au

Fijian fan (see page 22)

be innovative

Part ceiling fan, part light fitting, Fanaway sets new standards in sustainable interior design. At rest, it's a stylish pendant light; turn it on and it opens out gracefully to circulate the air in your room. The secret? Fanaway features unique retractable blades which conceal neatly away when it's switched off, leaving a less cluttered environment. Energy efficient by design, the aerodynamic blades create a strong cooling breeze in any room.

- Airflow** 0.9m air movement per second

Lucci

Remote Controls

Imagine the ease of being able to control the light and action of a fan from a remote. Each Beacon Lighting fan can be installed with a receiver which means that when installing a fan into an existing light point there is no need to run an extra wire to control the fan, as the remote does everything for you. You will save on additional installation costs and have the convenience of a remote control.

Remote controls sold separately.

Extension Rods

Do you have high ceilings and think that installing a fan will provide no benefit? Well think again, all Beacon Lighting fans come with an optional extension rod perfect for those high ceilings. Our extension rods come in a standard size of 900mm but you can easily cut them to size to suit your requirements.

Extension rods sold separately.

Fan Lights

Don't be afraid of installing a fan in your home and losing the light source because all Beacon Lighting fans are light adaptable, so you can keep your home cool in summer and warm in winter, whilst still retaining your light source.

How to select fans for your rooms?

Large rooms

For living or family rooms and master bedrooms, choose a **132cm** fan or larger.

Medium to small rooms

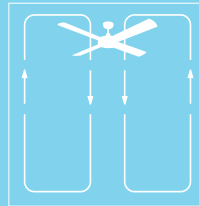

Kitchen, dining room, kids bedroom and offices, choose a **122cm** fan or smaller.

Outdoor areas

BBQ areas, under pergolas, verandahs and patios, choose a weatherproof fan.

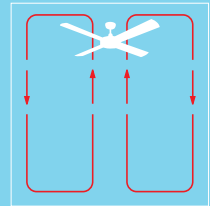

Energy efficient fans

Ceiling fans save energy and money. You can save up to 40% off your cooling costs when you use your fan in conjunction with your air conditioner. And when you run your fan on low speed for 6 hours, it uses less energy than running a 10 watt pilot globe, which is equivalent to less than one cent per day.*

Summer Cycle

In summer, your fan circulates the air resulting in a cooling breeze.

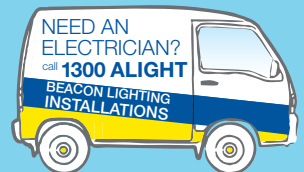

Winter Cycle

In winter, by reversing the fan rotation, the warm air is pushed from your ceiling down along the walls of the room. This keeps the room warmer and reduces heating costs.

Fan warranties

- 2 year comprehensive in-home warranty on all Lucci and Airfusion fans which can be extended by 1 year to 3 years when you install your fan using our Beacon Electricians
- 5 year motor replacement on all Concept fans
- Beacon Lighting installations is only available in NSW, VIC and QLD

* Only available on Lucci and Airfusion fans.
