

Panasonic DC 24 Hour Ventilation and Exhaust Fan with Motion Sensor and Run-on Timer

SKU: 209085

Details

Panasonic 24 Hour Ventilation and Exhaust Fan with Motion Sensor and Run-on Timer

Take the guesswork out of bathroom ventilation with the Panasonic FV-24JR4 ceiling-mounted exhaust fan. Featuring an **integrated motion sensor**, the fan automatically activates when you enter the room, helping manage moisture and maintain fresh airflow without needing to manually switch the fan on.

Delivering up to **220m³/h airflow**, the FV-24JR4 also features **24-hour ventilation**, a built-in **15-minute run-on timer** and intelligent airflow control for effective, consistent ventilation.

Key features:

Integrated **motion sensor** automatically activates the fan when movement is detected

Up to **220m³/h airflow** for effective bathroom ventilation

24-hour ventilation mode for continuous air circulation

Built-in **15-minute run-on timer** continues ventilating after the room is vacated

Intelligent airflow technology automatically responds to changes in air pressure to help maintain consistent air volume

Noise-dampening double chamber design for quiet operation

Designed to help remove excess moisture and reduce conditions that can contribute to mould

Discreet ceiling-mounted design

3-year parts and labour warranty

Automatic ventilation when you need it

The integrated motion sensor detects when the room is occupied and automatically activates the exhaust fan. When you leave, the built-in **15-minute run-on timer** keeps the fan operating to help remove residual humidity and moisture before automatically switching off.

It's a convenient solution for bathrooms, ensuites and other moisture-prone areas where the exhaust fan may otherwise be forgotten.

Continuous 24-hour ventilation

For spaces that benefit from ongoing air circulation, the FV-24JR4 also features a 24-hour ventilation mode. This allows the fan to maintain continuous airflow throughout the day, helping create a fresher and more comfortable indoor environment.

Intelligent airflow control

Panasonic's intelligent airflow technology responds to changes in air pressure within the ventilation system, helping maintain consistent airflow even when ducting or installation conditions create additional resistance.

Combined with a noise-dampening double chamber design, the FV-24JR4 provides effective ventilation while keeping operating noise to a minimum.

About Panasonic

With more than 100 years of experience in product innovation, Panasonic is a recognised name in air conditioning and ventilation. Its ventilation products are designed with a focus on reliable performance, effective airflow and everyday comfort.

Specifications

SKU	209085
Colour/Finish	White
Airflow	220m3/hour
Location	Indoor Use Only
Globe Included	false
Globe Quantity	0
Voltage	240V
Current	DC
Fan Motor Wattage	23W
Decibels	43
Rpm	0
Brand	Panasonic
Style	Modern
Warranty	3 years

Dimensions

Height (mm)	192
Width (mm)	300
Depth (mm)	300
Weight (kg)	3
