DC Motor - Efficient, Cost Saving, and Quiet

The most energy-efficient ceiling fans on the market right now are DC or direct current, fans. The key to their improved airflow and low energy consumption is their motor, which also helps you save money on your electricity bill. Since the motor is small and light, DC ceiling fans have sleek designs that fit better in your interiors and cost just one cent an hour to run. Additionally, they are silent in operation, making them ideal for private spaces in your house like the bedroom. You have a lot of versatility with the speed settings of DC fans, which range from a light breeze to an extremely intense airflow.

Remote Control

6-speed rechargeable remote control included. For instructions on how to pair the remote, please follow the steps in this video: Remote Pairing

Smart Compatible

Insert the Lucci Connect Wi-Fi Module (sold separately **-** 216180) into the receiver to activate smart functionalities. Once paired with the Lucci Connect app, you can turn your fan on/off, adjust its speed, set timers, and even create schedules based on the temperature outside.

Optional Light

Versatility to use light with a GX53 globe (sold separately), or use included cap to cover the socket for a no light option.

Alfresco Rating

Suitable for indoor and alfresco areas provided the fan is fully undercover, protected from water, wind, dust, and salt, with a minimum of 2 walls.

Recommended Room Size

For rooms between 3m x 3m and 4m x 4m, we recommend a fan between 122cm and 142cm.
