

Cali 3-in-1 Bathroom Heater, Exhaust Fan and Light in White with 2 x 275W Heat Lamps

SKU: 209120

Details

The Cali 3-in-1 bathroom heater is a modern all-rounder for small to medium-sized bathrooms and ensuites, offering heating, lighting, and ventilation in a sleek, low-profile design. Four replaceable 275W radiant heat lamps deliver instant, direct infrared warmth—ideal for drying off on cold mornings. This type of heating warms your skin and body, not just the air, making it especially effective when placed directly above your drying area. Dual heat modes let you switch between high and low settings for personalised comfort, while the 12W cool white LED globe provides bright, even illumination. The built-in exhaust fan helps reduce steam and moisture, and the IPX4 rating ensures safe use in wet areas. Compatible with 125mm ducting (1.5m Included), it also includes a backdraft stopper to prevent re-entry of air and odours, plus a removable faceplate for easy maintenance. Installation is simple with durable pivot clamp clips, and a 4-gang wall switch is included for convenient, separate control of each function.

TIP: For enhanced air extraction, pair this unit with a standalone exhaust fan placed directly over the shower. A remote control is also available separately. Need help choosing the right setup? Our team uses a handy airflow calculator to guide you.

Certified Airflow Performance

This fan has been tested to the internationally recognised ISO 5801 standard, ensuring its airflow performance is accurately measured and validated in real-world applications.

Specifications

SKU	209120
