Ceiling Fan T-Hook Mount for Ceiling Rose

SKU: 210009

Details

The T-Hook is essential when dealing with an uneven ceiling, such as a ceiling rose. It allows for the installation of a fan without causing damage to the ceiling design. The T-Hook requires only one hole to be drilled through the rose with the T-Hook than being secured to a beam in the ceiling, giving your fan a virtually unseen flat surface to be mounted on. This T-Hook was made for Hunter Pacific fans but usually works with any brand of fan. Please check with your electrician before purchasing.
