Command 450mm LED Flush Mount with RGB + Full White Spectrum in White

SKU: 181090

Details

The Command LED flush mount is a large-format ceiling light designed to combine adjustable white light with RGB colour control in a clean, minimalist profile. Finished in white, it suits bedrooms, living rooms and spaces with low ceilings where flexible lighting control is required.
This flush mount delivers up to 1,700 lumens from a 24W output and offers a wide colour temperature range from 2700K through to 6500K, along with full RGB colour selection. Lighting scenes, brightness and colour changes are controlled via the included remote, allowing smooth transitions between warm white and daylight, solid RGB colours and dynamic lighting effects. Dimmable operation supports adaptable light levels, while a colour rendering index above 80 ensures consistent colour performance. With a 45 centimetre diameter and Class II double-insulated construction, the Lucci Command LED flush mount provides versatile, remote-controlled lighting in a streamlined ceiling design.

Specifications

SKU	181090
