

Harbour 1 Light Adjustable Wall Spot in Copper

SKU: 220460

Details

The Harbour range is crafted from real copper with brass highlights, offering a timeless and durable outdoor lighting option.
This range includes a 1 light adjustable wall spot and a 2 light up/down wall light, both designed for 240V connection for easy installation. The adjustable head allows you to direct light where needed, and the fitting uses a GU10 globe, so you can choose the right brightness and beam angle to suit your space.
With an IP44 rating, this light is suitable for outdoor use in covered areas. It is also coastal rated, making it a great option for homes near the coast.
Over time, the natural copper finish will develop a patina as it reacts to the environment. The speed and depth of this change will vary depending on the location, particularly in coastal or humid areas.
