Details

The Karine portable lamp pairs Spanish alabaster with a bronze metal base for a compact, refined design. The natural alabaster softly diffuses the integrated LED, creating a warm ambient glow that highlights the unique character of the stone. Rechargeable via USB-C, Karine can be easily moved throughout the home without the need for a nearby power point. Touch controls provide smooth dimming and a choice of three colour temperatures – 3000K, 4000K or 5000K – to suit different settings. Its petite size makes it ideal for bedside tables, shelving, dining settings or anywhere a subtle layer of light is needed. As alabaster is a natural material, variations in colour, tone and pattern are to be expected and make every lamp unique.
