

Kyber 137cm DC Close to Ceiling Fan in Black with Koa Blades

SKU: 213363

Details

The Kyber CTC ceiling fan range brings the distinctive sculpted form of the Kyber collection to a close-to-ceiling design, making it ideal for rooms with lower ceiling heights. Available in white, white with ash blades, black and black with koa blades, the range features three organically shaped ABS blades with sweeping curves and tapered tips that create a striking focal point in contemporary interiors.
Powered by an energy-efficient DC motor, the Kyber CTC delivers strong airflow with quiet operation and includes a 7-speed remote for convenient control. The low-profile motor housing sits close to the ceiling while maintaining the signature flowing blade design that defines the range. Light and non-light options are available, with light models compatible with a replaceable GX53 globe for easy maintenance. Coastal-rated construction extends its suitability to covered outdoor environments, making the Kyber CTC range a practical choice for larger bedrooms, living spaces and alfresco areas where ceiling clearance is a consideration.

Low Profile

Low profile fans that fit your space are necessary if your home has low ceilings. Some of these ceiling fans only protrude 19.5 cm from the ceiling, allowing them to sit flush against the ceiling. This makes the space safer for everyone in your house and makes it appear less cluttered and more open.

DC Motor - Efficient, Cost Saving, and Quiet

The most energy-efficient ceiling fans on the market right now are DC or direct current fans. The key to their improved airflow and low energy consumption is their motor, which also helps you save money on your electricity bill. Since the motor is small and light, DC ceiling fans have sleek designs that fit better in your interiors and cost just one cent an hour to run. Additionally, they are silent in operation, making them ideal for private spaces in your house like the bedroom. You have a lot of versatility with the speed settings of DC fans, which range from a light breeze to an extremely intense airflow.

Remote Control

7-speed remote control with timer function and natural wind mode included. For instructions on how to pair the remote, please follow the steps in this video: Remote Pairing

The remote's built-in timer lets you set the fan to switch itself on or off after 1 to 12 hours. Drift off with the fan running and let it shut down on its own, or have it start before you arrive home so you walk into a cooler room. It's an easy way to stay comfortable and keep running costs down, without needing to get up or remember to turn the fan off.

Coastal Rating

Suitable for indoor, alfresco, and coastal areas, provided the fan is fully undercover, protected from water, wind, and dust, with a minimum of 1 wall.

Recommended Room Size

For rooms between 3m x 3m and 4m x 4m, we recommend a fan between 122cm and 142cm.

2-Year In-Home + 7-Year Motor Replacement Warranty

We provide a 2-year in-home warranty and a 7-year motor replacement warranty on all hard-wired Lucci or Fanaway fans that were purchased from 1st October 2022. Plus, if you have your fan purchased or installed by a Beacon Lighting Trade member, we'll extend your in-home warranty on the nominated Lucci or Fanaway fan for an extra 1 year, which means you'll enjoy a 3-year in-home warranty.

Specifications

SKU	213363
