

Lucci Connect Dimming/Switch Mechanism Only

SKU: 299043

Details

The Lucci Connect Push Button Dimmer offers convenient lighting control through the Lucci Connect app or manually via the push button. Featuring trailing edge dimming technology, an adjustable minimum brightness setting and interchangeable black and white button caps, it supports dimmable LED lighting up to 180W, with voice control available via Google Home or Amazon Alexa when paired with a Lucci Connect Gateway (sold separately).

Installation Note: A separate isolation wall switch is required for ON/OFF switching and electrical isolation, as the dimmer must not be used as a standalone switching device.
