

MFL Artisan LED Colour-Shifting Cylinder Wall Bracket with Dimmer in Brass

SKU: 197042

$279.00 (inc GST)

Details

Set the perfect mood with the MFL Artisan LED Dim-to-Warm Wall Bracket. With a sleek, metal profile, this modern piece highlights the beauty in simplicity. This unique design is ideal for bedsides and vanities and includes a built-in dial dimmer switch for customised illumination. With “sunset dimming” functionality, you can bask in bright white light to soft warm glow and everything in between. The MFL Artisan LED Dim-to-Warm Wall Bracket is the practical solution to your lighting needs and is compatible with all Artisan shades (excluding Dome).

Mix and match from the collection.

Step One - Select your fitting

Choose the best light source for your space - from surface-mounted wall lights and minimalist pendants to a sleek recessed wall sconce!

Step Two - Indulge your style

The Artisan collection offers a wide range of colours to suit most needs - from muted brushed nickel, bold brass, monochromatic black and white or timeless bronze. For recessed fittings, you can select single or double plates to allow for unique configurations - whether a standalone light, an impactful double light (perfect for vanities), or integrate an Artisan Dimmer to create a practical and stylish bedside light! All in a variety of colours.

Step Three - Give Shade

Choose from a range of decorative glass and acrylic shades or elevate the look with hand-crafted Spanish Alabaster stone! The right shade really can bring your Artisan light to life!

Step Four - Take Control

Our unique Artisan Dimmer can be paired with practically any light and is the perfect companion.

Be your own Artisan

Create a unique wall sconce by pairing Artisan Recessed Lights with an assortment of stylish shades and decorative plates in varying colours and configurations.

Looking for something that's a little more "off the wall"?

Our Artisan Wall Bracket, Surface Mounted Dot, and matching Pendants are all available in the same colours and pair

beautifully with a selection of glass and acrylic shades.

A new way to control your lighting.

Add an Artisan Dimmer module to allow for direct control without the need for any additional wall switches. Simply rotate to dim and press to turn on/off.

For our Artisan Recessed collection, the Dimmer module can be added straight into the wall sconce itself, using our double plate and accompanying light and shades.

Better yet, the Artisan Dimmer can be installed as a standalone dimmer mech and used with a wide range of products (not just Artisan). No more boring white knobs on a rectangle plate! Perfect for bedsides, kitchen splashbacks or highly visible locations where a standard switch and dimmer just don't hit the mark.

Did we mention they're all splash proof?

Not content on just being incredibly aesthetically pleasing, the entire range of MFL Artisan products are IP44, making them ideal for use in bathrooms and other internal wet areas where, from time to time, they may be hit with a stray splash of water!

Selected items in the range also feature Scene Change technology that allows you to change the colour temperature of the light with just the flick of a switch!
