

MFL Solstice LED Wall Sconce in Black

SKU: 300958

Details

The Solstice wall light features a sculptural uplighting design available in textured black or textured chalk finishes. Its curved silhouette creates a minimalist architectural form that blends easily into contemporary interiors while providing soft ambient illumination. An integrated LED light source offers selectable colour temperatures from 3000K to 5000K, allowing the light tone to be adjusted to suit the space. With high colour rendering and dimmable functionality, the fitting provides both flexibility and consistent lighting performance. Designed primarily as an uplighter, the Solstice also includes an opening at the base that creates a soft wash of light down the wall. The prismatic diffuser helps distribute light evenly, making it ideal for hallways, living areas or feature walls where gentle architectural lighting is desired.

Specifications

SKU	300958
Colour/Finish	Black
