

Powermesh 1 Gang Dimmer Switch in Black

SKU: 299217

Details

The Powermesh light dimmer is so much more than a normal light dimmer. Advanced dimming features at the switch plus app and voice control allow you to adjust light levels and monitor energy use from anywhere. The on/off dimming button also lets you press and hold for smooth dimming, double press for full brightness and triple press for a timed fade to off – just set a time you would like them to fade off in the app.
Take control of all your lighting/dimming anywhere, anytime with the free Zimi app. Turn your lights on and off, adjust the brightness, activate a timed fade, set automatic schedules, auto off timers, check energy use and also share your Powermesh network with family members, so everyone has smart control on their phone.
Voice control* your appliances for hands-free convenience, using either Google Assistant, Amazon Alexa or Siri Shortcuts. 'Dim the dining room lights 50%'. 'Turn the lounge room lights on to full brightness'. Add a lighting/dimming command to a Voice Routine and automate multiple things with a single phrase.
*Voice control requires the Zimi Cloud Connect (sold separately), a compatible smart home speaker, and an active internet connection.
Visit www.zimi.life to learn more about how you can make life easier and smarter every day.
