

Powermesh Fan and Light Controller in White

SKU: 299196

Details

The Powermesh fan controller provides touch control and multi-speed control to your AC fan. App, voice and intuitive touch control brings a new level of convenience and comfort. To control via touch, just swipe up the indicator to change fan speeds, and turn on the fan or room lights. Our unique Speed Sense feature automatically adjusts the fan speed when the temperature changes. As your room cools down, the fan slows down; if the room heats up, the fans speeds up. It's automatic climate control in a fan. Triple tap the fan control indicator on the wall or the fan icon in the app to activate this feature.

Take control of all your fans anywhere, anytime with the free Zimi app. Turn them on and off, change fan speed, set automatic schedules, auto off timers, check energy use and share your Powermesh network with family members, so everyone has smart control on their phone.

Voice control* your fans for hands-free convenience, using either Google Assistant, Amazon Alexa or Siri Shortcuts. 'Turn on the kitchen fan'. 'Set the fan speed to low.' 'Turn all the fans off in 1 hour'. Add a fan command to a Voice Routine and automate multiple things with a single phrase.
*Voice control requires the Zimi Cloud Connect (sold separately), a compatible smart home speaker, and an active internet connection.
