Slide 2 Light Adjustable Up/Down Wall Sconce in Black

SKU: 300620

Details

Slide Wall Sconce

The Slide wall sconce is a modern lighting solution combining minimalism and versatility. Featuring two interchangeable GU10 globes, it directs light both upward and downward for a balanced and dynamic effect. The standout feature is its adjustable front shade, which can slide up or down to customise the light's effect. Use it to create a narrow downward beam for highlighting objects or a wider upward glow for a soft, ambient atmosphere. Available in classic black or white, or opt for the high-gloss polished chrome finish to make a bold, reflective statement. Perfect for hallways, bedrooms, or living areas, the Slide wall sconce is as functional as it is stylish.
TIP: Install at eye level in hallways or living spaces and experiment with shade placement to tailor the light's effect to suit your style and mood.
