

Thermalite 3-in-1 Bathroom Heater, Exhaust Fan and Light in White with 4x 275W Heat Lamps

SKU: 200030

Details

The Thermalite 3-in-1 bathroom heater is a classic everyday essential for small to medium-sized bathrooms. Combining warmth, light, and ventilation in one ceiling-mounted unit, it's a practical and cost-effective choice for year-round comfort. Four replaceable 275W radiant heat lamps deliver instant, direct warmth—ideal for drying off on cold mornings. This style of infrared heating warms your skin and body rather than just the air, making it perfect for placement directly above your drying area. With dual heat modes, you can switch between high and low settings for personalised comfort, while the cool white LED globe ensures bright, clear illumination. A removable faceplate allows for easy cleaning and maintenance. It works with 100mm ducting (sold separately), includes a backdraft stopper to prevent re-entry of air and odours, and is IPX4 rated—making it safe for use in wet areas.

TIP:

For ultimate air extraction, we recommend pairing this unit with a standalone exhaust fan positioned directly over the shower. A remote control is also available separately for added convenience. Not sure what's right for your space? Our team can help you choose using our handy airflow calculator.
