CAUTION
**READ INSTRUCTIONS CAREFULLY FOR SAFE
INSTALLATION AND FAN OPERATION.**

THANK YOU FOR PURCHASING

Thank you for purchasing the latest in energy saving ceiling fans. This fan runs on DC (direct current) power which gives it the benefit of being super energy efficient whilst still maintaining high volume air-movement and silent operation.

Energy saving - The DC motor is the latest technology in fan design. Its highly efficient motor saves up to 65% more energy than ceiling fans with traditional AC motors.

Silent operation – This DC fan motor is programmed with a stabilised current which efficiently reduces motor noise.

Low operating temperature – The DC power is managed effectively which brings down the motor operating temperature to less than 50°C. This results in a much cooler motor than a standard AC fan and increases the longevity of the motor.

6 speed remote control - Regular AC ceiling fans usually come with only 3 speeds, this DC fan comes complete with a 6 speed remote, which gives a greater choice of comfort levels.

SAFETY PRECAUTIONS

1. The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety.
2. Children should be supervised to ensure that they do not play with the appliance.
3. An all-pole disconnection switch must be incorporated into the fixed wiring, in accordance with local wiring rules.

IN AUSTRALIA**WARNING:**

FOR SAFE USE OF THIS FAN AN ALL-POLE DISCONNECTION MUST BE INCORPORATED INTO THE FIXED WIRING IN ACCORDANCE WITH THE WIRING RULES.

As outline in clause 7.12.2 of AS/NZS 60335-1 for meeting the minimum electrical safety of this standard.

Please note warranty will be void if installation is without a means for an all-pole disconnection incorporated in the fixed wiring in accordance with the wiring rules.

Example: If a fan is connected to a circuit that can be isolated via an all-pole safety switch at the switchboard, then this is considered to be an all-pole disconnection to the ceiling fan electrical circuit, meeting the requirements of clause 7.12.2 of AS/NZS 60335.1.

A single-pole switch on the active of the receiver input of remote control must also be included in the wiring, and located the same room as the ceiling fan.

4.  Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities. Contact your local government for information regarding the collection systems available. If electrical appliances are disposed of in landfills or dumps, hazardous substances can leak into the ground water and get into the food chain, damaging your health and well-being.
5. The structure to which the fan is to be mounted must be capable of supporting a weight of 24kg.
6. The fan should be mounted so that the blades are more than 2.1 m above the floor in Australia.
7. This fan is suitable for indoor, alfresco and coastal areas where the fan is fully undercover with a minimum of 1 wall. This fan is not waterproof. When installed in an alfresco or coastal area, the ceiling fan must be positioned in a location protected from water, wind and dust. Exposure to these elements will void the warranty. Mounting the fan in a situation where it is subject to water or moisture is dangerous and may increase the risk of damage, injury or electrical shock and will void the warranty.
8. Must be assembled and installed by a licensed electrician.
9. The replacement of parts of the safety suspension system device shall be performed by the manufacturer, its service agent or suitably qualified persons.
10. The fixing means for attachment to the ceiling such as hooks or other devices shall be fixed with a sufficient strength to withstand 4 times the weight of the ceiling fan; that the mounting of the suspension system shall be performed by the manufacturer, its service agent or suitably qualified persons.
11. WARNING: If unusual wobbling or oscillating movement is observed, immediately stop using the ceiling fan and contact the manufacturer, its service agent or suitably qualified persons.
12. This remote contains battery that is non-replaceable.
13. The remote control can only be powered at a safe extra low voltage (DC 5 V).

PARTS LIST

- Unpack your ceiling fan carefully. Remove all parts and hardware.
- Lay out all the components on a smooth surface and make sure there are no components missing before assembling. If parts are missing, return the complete product to the place of purchase for inspection or replacement.
- Check whether the ceiling fan has been damaged during transport. Do not operate/install any product that appears damaged in any way. Return the complete product to the place of purchase for inspection, repair or replacement.
- Examine all parts, you should have the following:

Fig. 1

1.	Mounting bracket x 1	5.	Remote receiver x 1
2.	Fan assembly with motor housing, down rod, canopy cover and canopy x 1	6.	Mounting bracket screws x 2pcs
3.	Blade x 3	7.	Blade screw x 9 (and 1 spare)
4.	Remote transmitter with holder & screws x 1 set	8.	Balancing kit x 1 set

INSTALLING THE MOUNTING BRACKET

- The ceiling fan must be installed in a location so that the blades are spaced 300mm from the tip of the blade to the nearest objects or walls.
- Install the hanging bracket to the ceiling joist or structure that is capable of carrying a load of at least 24kg, with two long screws provided. Ensure at least 30mm of the screw is threaded into the support. (Fig. 2)

Fig. 2

NOTE: The bracket screws provided are for use with wooden structures only. For structures other than wood, the appropriate screw type **MUST** be used. Ensure the screws used are suitable for the mounting surface and the surrounding environment.

ANGLED CEILING INSTALLATION

This fan hanging system supports a maximum 15 degree angled ceiling installation. (Fig.3)

Fig. 3

INSTALLING THE FAN

BLADE INSTALLATION

- Remove the ball joint (1) and dowel pin by loosening the set screw (2). (Fig.4)
Do not discard, keep these parts, they are required to reassemble later.
- Remove the canopy (3) and the motor housing (5) from the down rod (4). (Fig.4)

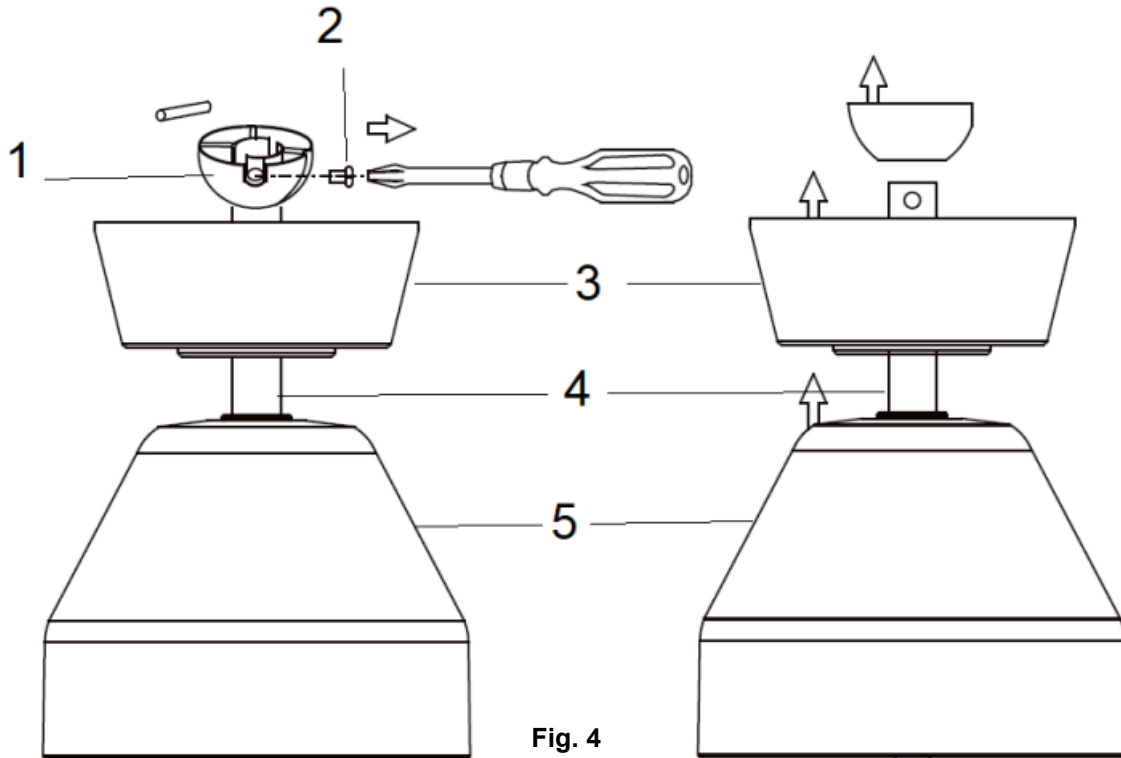

Fig. 4

- Align the 3 mounting holes on the blade (7) to the 3 mounting screw holes on the motor (8) and secure using 3 blade screws (6). Ensure the screws are tightened equally and evenly to reduce the chance of warping or unbalancing. Take care not to over tighten the screws as this can damage the blades. (Fig.5)
- Repeat the process for the remaining blades.

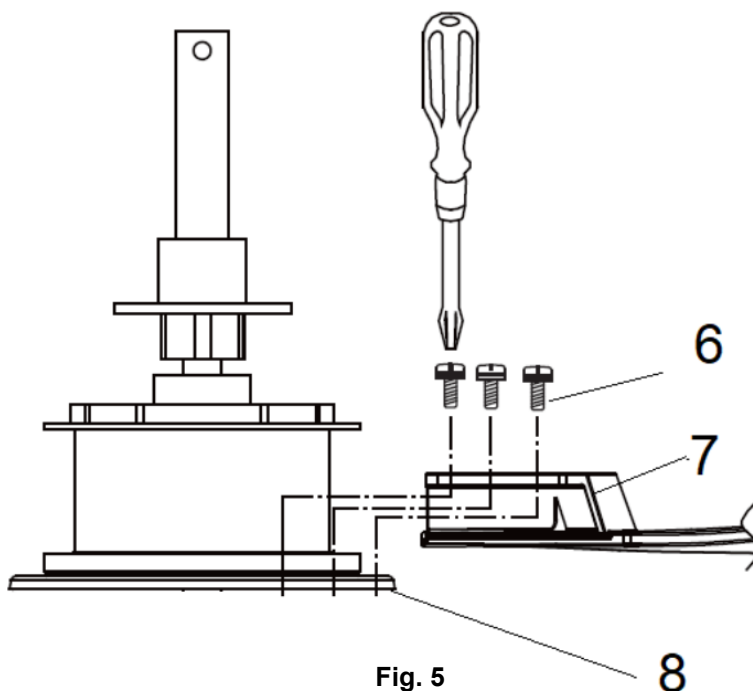

Fig. 5

- Reinstall the motor housing and canopy onto the down rod. (Fig.6)
- Reinstall the ball joint and dowel pin onto the down rod and secure using the set screw. (Fig.6)

Fig. 6

HANGING THE FAN

Lift the fan assembly onto the mounting bracket. Ensure the key slot (A) of the hanger ball is positioned on the key pin (B) of the mounting bracket (C) to prevent the fan from rotating when in operation. (Fig.7)

Fig. 7

ELECTRICAL WIRING DIAGRAM

WARNING: FOR YOUR SAFETY ALL ELECTRICAL CONNECTIONS MUST BE UNDERTAKEN BY A LICENSED ELECTRICIAN.

NOTE: AN ADDITIONAL ALL POLE DISCONNECTION SWITCH MUST BE INCLUDED IN THE FIXED WIRING.

NOTE: IF THERE ARE TWO OR MORE DC CEILING FANS INSTALLED IN THE ONE LOCATION, AN SINGLE-POLE SWITCH IS REQUIRED FOR EACH CEILING FAN. THIS IS REQUIRED WHEN PROGRAMMING THE REMOTE AND RECEIVER TO PAIR TOGETHER.

Ensure the motor earth wire is connected to the single earthing terminal block “1” in Fig.8

From mains supply to mounting bracket terminal block: (Fig.8)

- Connect the live supply wire to the “L” terminal of the terminal block on the mounting bracket.
- Connect the neutral supply wire to “N” terminal of the terminal block on the mounting bracket.
- Connect earth wire to the earth terminal of the terminal block on the mounting bracket.

Hang the fan (Refer to “hanging the fan” Fig.7).

From mounting bracket to receiver and motor: (Fig.8)

- Connect the motor earth wire to the single earthing terminal block “1” in the diagram below. (Fig.8)
- Connect the supply wiring from the mounting bracket to the input of the receiver.
- Connect the output wires of the receiver to the input wires of the fan motor via 4-port quick connectors.
- Connect the earth wire of the receiver to the earth wire from the mounting bracket via single-port quick connectors.

Fig. 8

Carefully insert the receiver above the hanger ball in the remainder spacing in the mounting bracket. Take care not to damage or loosen any of the wiring. (Fig.9)

Fig. 9

FINISHING THE INSTALLATION

- Ensure the earth wiring is secure and correct by performing an earth continuity test from the fan's accessible metal body back to the earth terminal at the terminal block on the mounting bracket.
- Loosen the two screws at the bottom of the mounting bracket by half a thread. (Fig.10)
- Slide the canopy up to the mounting bracket and align the key holes on the canopy with the screws on the mounting bracket. Turn the canopy until it locks into place with the narrow section of the key holes and secure it by tightening the two screws. Avoid damaging the electrical wiring prepared previously. (Fig.10)
- Attach the canopy cover onto the canopy by pushing the lugs into the holes. (Fig.10)

Fig. 10

INSTALLING THE TRANSMITTER HOLDER (Fig.11)

- Locate a suitable wall to fix the remote control holder with the 2 screws. (Fig.11a).
- Slide the remote into the holder to rest the remote. (Fig. 11b)

Fig. 11a

Fig. 11b

USING YOUR CEILING FAN

REMOTE CONTROL (Fig.13)

1. Test the remote by pressing and holding any button. the LED will be lit up green light on the remote to indicate that there is power to the remote and it is ready for use to control the fan.
2. Follow the guide below to operate the fan and learn the functions.

Fan Off Button

Press the button to turn the fan off

Fan Increase Speed Button

Press the button to increase the fan speed, the fan has a total 6 speeds.

Fan Decrease Speed Button

Press the button to decrease the fan speed, the fan has a total 6 speeds.

Reverse Function Button

Press the button to activate the reverse running function.

The fan must be operating to activate the reverse function.

Timing control of the fan and light

(2 hour, 4 hours, 8 hours)

When the fan/light is working, press the button to activate the timer function and increase or decrease the time setting: 2 hours or 4 hours or 8 hours, the fan/light will turn off after the set time.

* Light On /Off Button

Press the button to turn the light on /off

* Light brightness increase button

* Light brightness decrease button

*The Whitehaven fan is without light

TYPE C USB charging port: When charging, the LED red light on the remote will always be on to indicate the battery is charging until the battery is full. The LED red light on the remote will turn off after the battery is full.

NOTE: If the battery is low, when pressing any buttons on the remote, the LED red light on the remote will flash 10 times in 3 seconds.

The remote has a memory function. If the fan is turned off by the isolating switch for over 7 seconds, the next time to turn on the fan will be on the last setting

THE FAN RECEIVER & REMOTE PAIRING

NOTE: This remote is supplied with default coding, the fan can be used without further pairing.
When the ceiling fan is installed, pairing the fan receiver and remote is NOT required.

**USB TYPE -C
Charging port**

REPAIRING THE FAN RECEIVER & REMOTE PAIRING

Note: The remote and receiver have already been paired during manufacturing. The following steps are only necessary if the remote and fan become unpaired or if you need to pair multiple fans.

When operating this pairing function, please stand within 3 meters distance to the fan.

PAIRING REMOTE & RECEIVER – WHEN 1 DC CEILING FAN IS INSTALLED IN ONE LOCATION

NOTE: Ensure that you have installed a single pole disconnection switch in the fixed wiring for the fan.

NOTE: Ensure power to the receiver is ON prior to pairing the remote with the receiver.

- Turn OFF the mains supply to the fan by the on/off wall switch for 30 seconds.
- Turn ON the power to the receiver.
- Press and hold the  button on the remote for 5 seconds within 30 seconds of switching the power ON to the receiver of the ceiling fan.
the LED on the remote will flash rapidly to indicate the pairing process is successful.
- Turn ON the fan and change the speed of the ceiling fan via the remote to check the operation and successful pairing.
- If pairing has been unsuccessful, repeat this set of steps again.

PAIRING REMOTE AND RECEIVER – WHEN 2 OR MORE DC CEILING FANS ARE INSTALLED IN ONE LOCATION

NOTE: Ensure that you have installed a single pole disconnection switch in the fixed wiring for each fan.

- If you want to control 2 or more ceiling fans with one remote, do as explained in the normal pairing process, but make sure all the ceiling fans' wall switches are turned ON.
- If you want to control them with individual remotes, do as explained in the normal pairing process, but make sure the other ceiling fans' wall switches are turned OFF. After the first fan is paired, turn the wall switch OFF and continue the normal pairing process with the next fan.

RESET TO DEFAULT FOR THE REMOTE CONTROL:

Press and hold the  button on the remote for 15 seconds within 30 seconds of switching the power ON to the receiver of the ceiling fan. When it exceeds 5 seconds, the LED on the remote will flash rapidly for pairing. Keep pressing the button until it exceeds 15 seconds, the LED on the remote will flash rapidly again, receiver will return to the default factory setting.

After resetting, the fan receivers will return to default mode and can be controlled by all remotes.

Note: when operating this reset function, please stand within 3 meters distance to the fan.

WITH WIFI FUNCTION

NOTE: The fan has Wifi function , if you don't want to control fan by the remote , you also can use the Wifi function to control your fan.

Install the WIFI Module (SKU#216180, Not included – sold separately) onto the fan remote receiver.

Switch on the power then set up the wireless & in-app control according to the 'LUCCI CONNECT user guide'

RESET OF WIFI MODULE :

Press and hold both the “” button and the “” button on the remote simultaneously for 15 seconds, the LED on the remote will flash rapidly.

This operation can be performed at any time.

Note: when operating this reset function, please stand within 3 meters distance to the fan.

REVERSE FUNCTION

Your ceiling fan can operate either in fan (summer) mode or reverse fan (winter) mode. Use the “” button on the remote to switch between summer and winter mode.

Summer mode: The fan will rotate in an anticlockwise direction. The airflow will be directed downwards for cooling in summer.

Winter mode: The fan will rotate in a clockwise direction. The airflow will be directed upwards, for energy conservation, ensuring an even temperature throughout your room during winter.

**REPAIRING THE FAN RECEIVER & REMOTE PAIRING**

Should the remote and receiver lose control after installation or during use, the pairing of the remote and the receiver must be repaired. Below are the operating symptoms and the method to repair the pairing of the DC ceiling fan remote and receiver.

Symptoms:

- Loss of control - Fan is only running at high speed after installation
- Loss of control - No reverse function after installation
- Loss of control - Remote cannot communicate with the receiver

Repairing Steps:

- Switch OFF the main power to the ceiling fan for 30 seconds.
- Switch ON the main power of the ceiling fan. Follow the same process as described in the 'Pairing remote & receiver' section to repair the pairing.
- Turn on and select the different speeds of the ceiling fan to check the operation of the fan.

AFTER INSTALLATION

WOBBLE:

NOTE: ceiling fans tend to move during operation due to the fact that they are mounted on a rubber grommet. If the fan was mounted rigidly to the ceiling it would cause excessive vibration. Movement of a few centimetres is quite acceptable and DOES NOT suggest any problem.

TO REDUCE THE FAN WOBBLE: Please check that all screws which fix the mounting bracket and down rod are secure.

BALANCING KIT: A balancing kit is provided to balance the ceiling fan on initial installation. Please refer to the instruction on how to use the balancing kit. The balancing kit can be used to assist re-balancing should the ceiling fan become un-balanced again. Store your balancing kit away after installation for future use if required.

NOISE:

When it is quiet (especially at night) you may hear occasional small noises. Slight power fluctuations and frequency signals superimposed in the electricity for off-peak hot water control, may cause a change in fan motor noise. This is normal. Please allow a 24-hour “breaking-in” period, most noises associated with a new fan disappear during this time. All electric motors are audible to some extent. Please note that this is not a product fault, and as such is not covered under warranty.

CARE & CLEANING

NOTE: Always turn OFF the power at the mains switch before performing any maintenance or attempting to clean your fan.

- Every 6 months periodic cleaning of your ceiling fan is the only maintenance required. Use a soft brush or lint free cloth to avoid scratching the paint finish. Please turn off electricity power when you do so.
- Do not soak or immerse your ceiling fan in the water or other liquids. It could damage the motor or the blades and create the possibility of an electrical shock.
- Ensure that the fan does not come in contact with any organic solvents or cleaners.
- To clean the fan blade, wipe with only a damp clean cloth with NO organic solvents or cleaners.
- The motor has a permanently lubricated ball bearing so there is no need to oil.
- This remote contains a rechargeable Li-ion battery that is non-replaceable.

TECHNICAL INFORMATION

Fan	70" WHITEHAVEN DC fan without light	
Fan Models	SKU# 213077	SKU#213078
Rated Voltage	220-240V~ 50Hz	
Rated Wattage (Motor)	50W	
Rated wattage (Lamp)	N/A	
Battery for remote	Rechargeable Li-ion battery (Non-replaceable, USB-C charging)	
Weight	5.8kg	
Canopy Dimensions	H:55mm Dia:150mm	

LUCCI CEILING FAN WARRANTY DETAIL

LUCCI FAN WARRANTY CONTACT INFORMATION:

Online Warranty Form: <https://www.beaconlighting.com.au/warranty-claims>

Email: warranty@beaconlighting.com.au

Lucci Fan Warranty Hotline: (Free Call) 1800 602 243

THIS WARRANTY IS VALID IN AUSTRALIA ONLY

In the event of service being required, please call the Lucci Fan Warranty Hotline on 1800 602 243 between 9am & 5pm (EST) Monday to Friday. Please make sure you have all the ceiling fan details filled out at the end of the manual before making the call.

Every Lucci ceiling fan is thoroughly inspected and tested before being released for sale. In addition to any warranty rights or conditions under statutory regulations, Lucci warrants all its ceiling fans against defective workmanship and faulty materials for two (2) years from the date of purchase. Following this, an additional seven (7) years motor replacement warranty applies. Lucci undertakes, at its option, to repair or replace, free of charge, each product or part thereof on condition that;

1. The fan or relevant part has not been subjected to misuse, neglect, or been involved in an accident.
2. The repairs are not required as a result of normal wear and tear.
3. The product was installed by a licensed electrical contractor.
4. A copy of the original receipt of purchase is presented.
5. 12 month warranty applies when used in any non-domestic applications.
6. This warranty does not cover stains, scratch and scuff marks, or dents if the product is purchased through a factory outlet or to refurbished items.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Lucci Design cannot be held responsible for any repair other than those carried out by it or one of its Authorised Service Agents. Please keep this warranty information in a safe place. This information must be produced in the event of service being required.
