

SKU# 220826, 220827

LUCCI LEDlux

- The wiring kit is for 12V application only and is rated for Max. 80VA load only.
- The wiring kit and connectors are not suitable for underground installation without protection from water or damp conditions. Ensure they are positioned in a location where the water can be easily drained away. They are not designed to be immersed in water.
- The installation location may require a gravel substrate to help with water drainage, to prevent the wiring kit and connectors being submerged in water after heavy rain or from watering the garden. Ensure water does not “pool” around the wiring kit and connectors.
