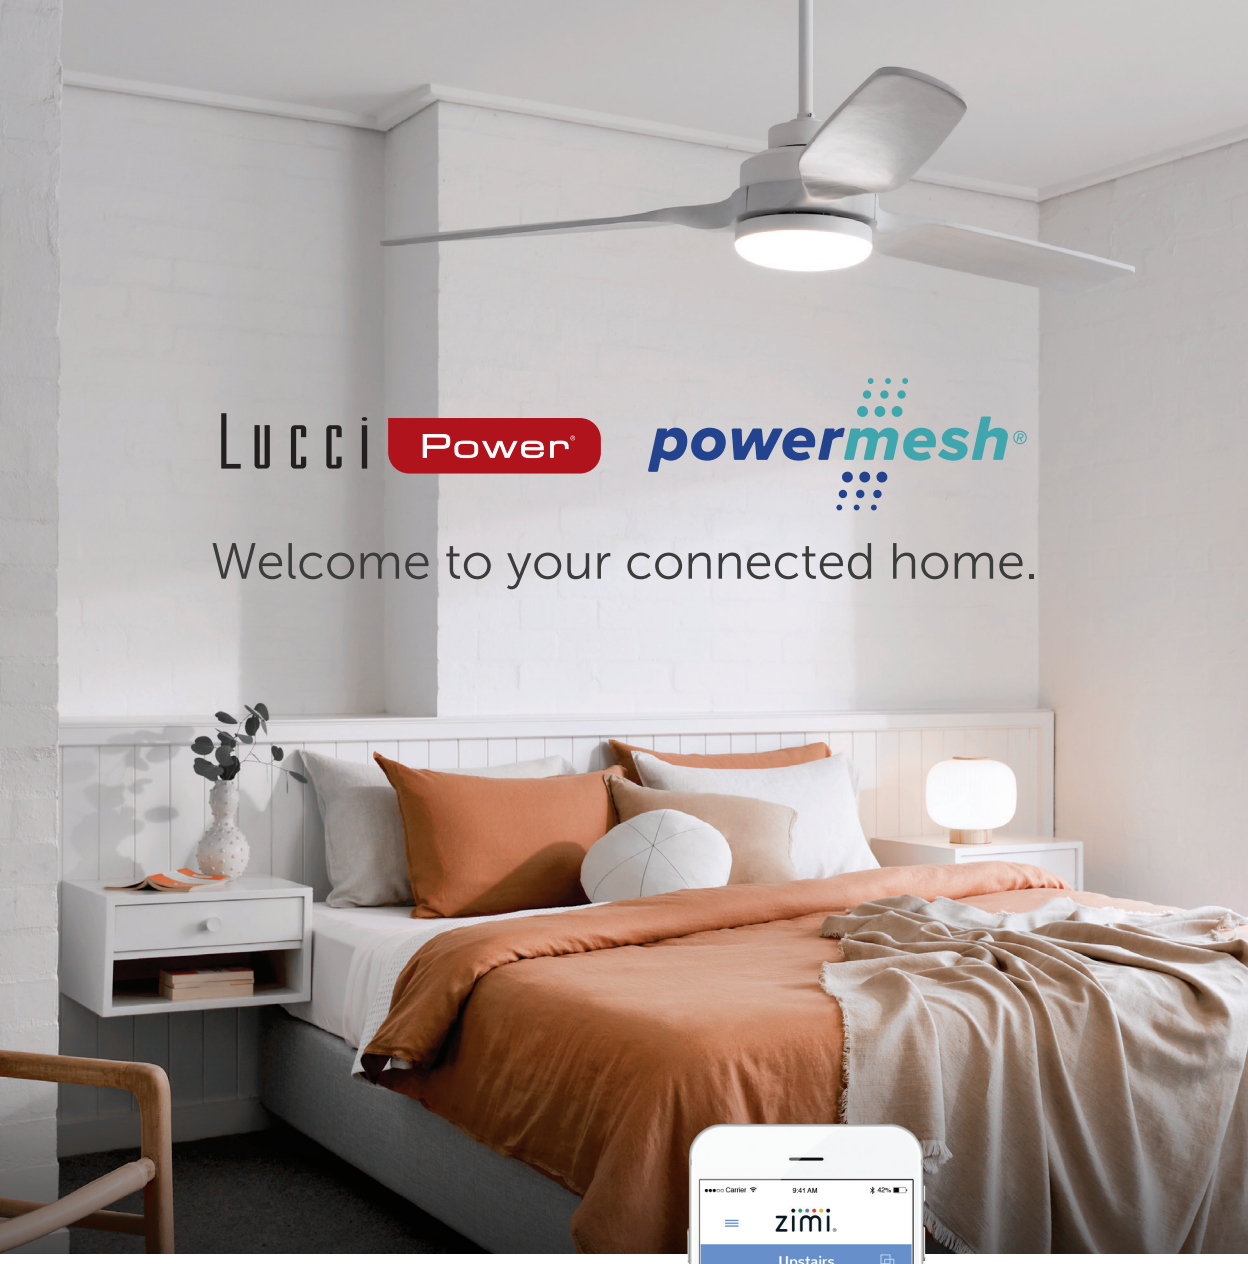
Lucci Power®

powermesh®

Welcome to your connected home.



Beacon LIGHTING

Lucci Powermesh Range

Our suite of Lucci Powermesh products offer a complete home automation solution that boasts pure simplicity. With the familiarity of traditional devices and the ease of smart device and voice control, you'll quickly become accustomed to the convenience.

zimi®

Enjoy simple control at your fingertips with the Zimi app on your smart phone or tablet.

Light and dimming

Dimmable light switches

Smooth dimming for your lighting with many features activated by a simple touch.

Multi-purpose switches

1-4 button switches

Suitable for controlling more than lighting with inbuilt scheduling and energy use monitoring.

Appliances

Double power point

Easily control and monitor the energy use of your appliances with inbuilt automatic scheduling.

Cloud Connect

Zimi Cloud Connect

Control your home's lighting, appliances and energy use from anywhere in the world.

works with the Google Assistant

Fan controller

Fan and light control

Control your light and fan speed with just a touch, the app or voice*. Its Speed Sense Technology senses the temperature and adjusts the speed automatically.

**Voice control requires Zimmi Cloud Connect.*

Lucci Power powermesh®

Simple. Secure. Reliable.

The future of connected devices uses mesh networks. Lucci Powermesh-enabled devices send and receive messages from each other, eliminating the need for a central hub and 2-way wiring. Each device plays a role, with more linked devices providing network reliability and a quicker response.

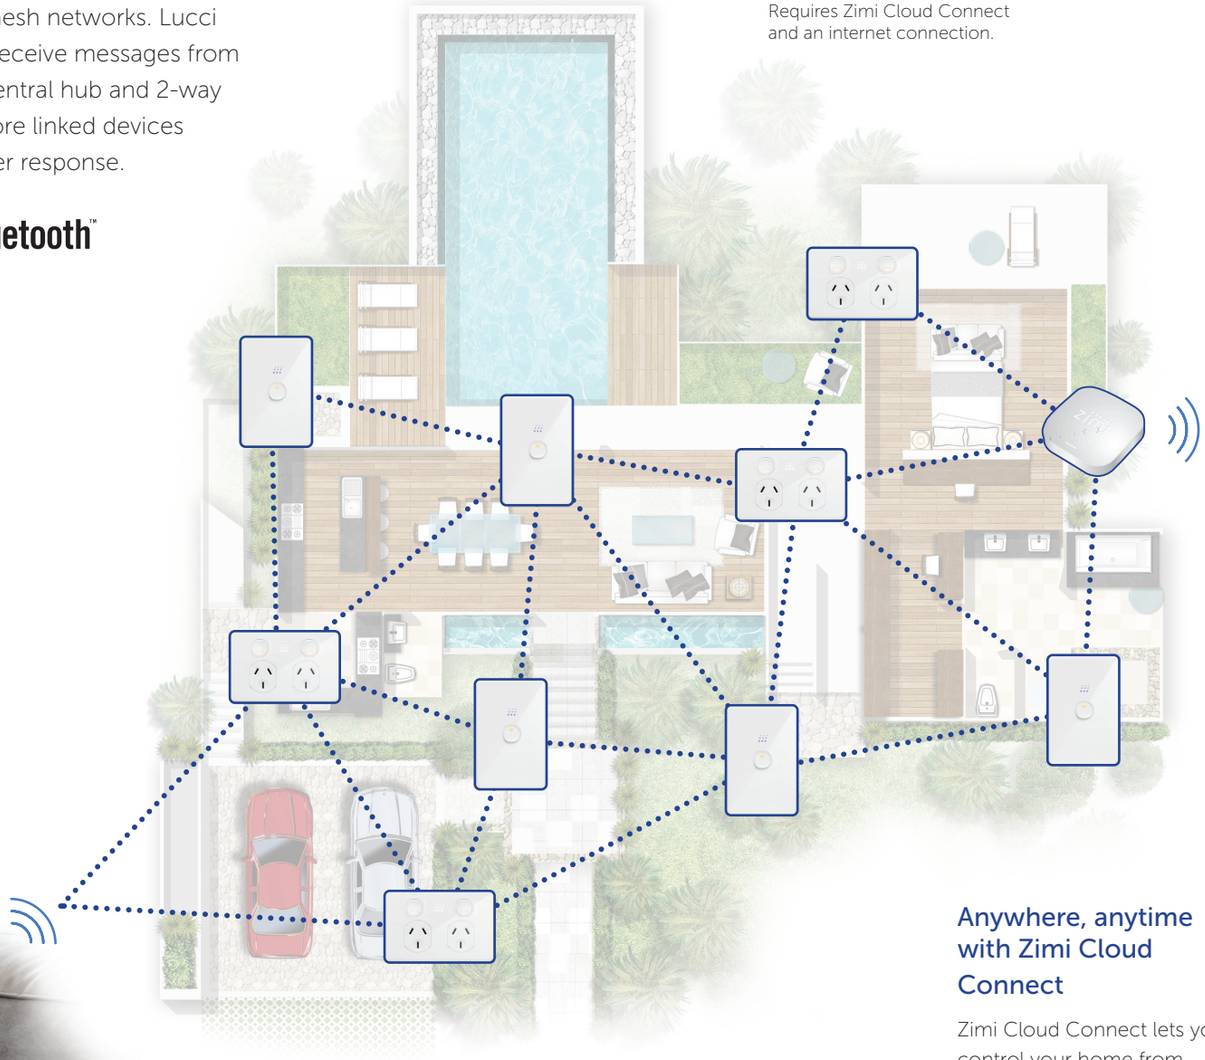
Bluetooth™

zimi®

Control at your fingertips

Download Zimi for free on your phone or tablet to take control of all your Lucci Powermesh devices.

GET IT ON Google Play | Download on the App Store



Voice control with the Google Assistant

Use voice commands to control Lucci Powermesh devices in your home hands-free. Just say, "Hey Google" to get started.

Requires Zimi Cloud Connect and an internet connection.

Lucci Power powermesh® ENABLED

Lucci Powermesh-enabled devices

Explore our entire range at **beaconlighting.com.au/luccipowermesh** Start with a few for simple home automation or get total convenience with a complete ecosystem.

Anywhere, anytime with Zimi Cloud Connect

Zimi Cloud Connect lets you control your home from anywhere in the world via the internet.

We've made it so simple.

Lighting control offers the most convenience in your home. Set the mood, light the task, increase security and save electricity. It's never been this easy.

Touch control

Tap on and off with a single touch.

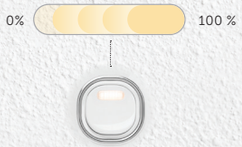
Tap twice to turn on full brightness.

Push and hold to dim up and down.

Tap thrice for a timed smooth fade to off.

Dimmable light switch

Designed to work with normal wiring in any home.



App control

No longer do you need to reach for the light switch. Enjoy total control with a simple-to-use app.

Mini dimmer indicator

Displays the brightness level of your lights, convenient when not directly in sight.

Dimming compatibility

Suitable for use with halogen, incandescent lamps and most dimmable LED lights. Dimming can also be disabled for simple on/off control.

The fan controller that's cooler than cool.

The elegant multi speed fan controller and light switch you control with touch. With some cool features, we know you'll be a fan in no time.

7 speed touch control. More levels of comfort.

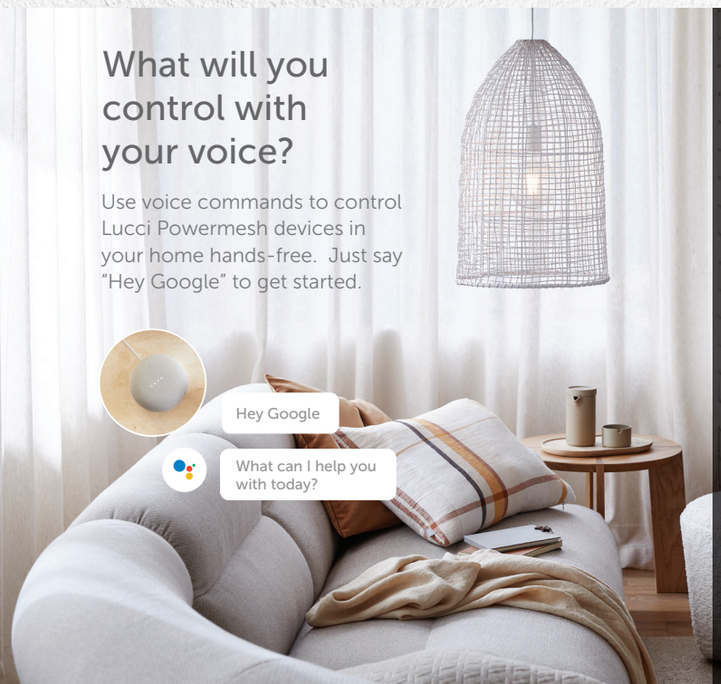
Light Switch
- Simple touch on and off.
- LED indicator

Fan Control
- Touch on and off.
- Slide to change speeds with LED indicator

Compatible with most AC motor ceiling fans (up to 120W max)

What will you control with your voice?

Use voice commands to control Lucci Powermesh devices in your home hands-free. Just say "Hey Google" to get started.

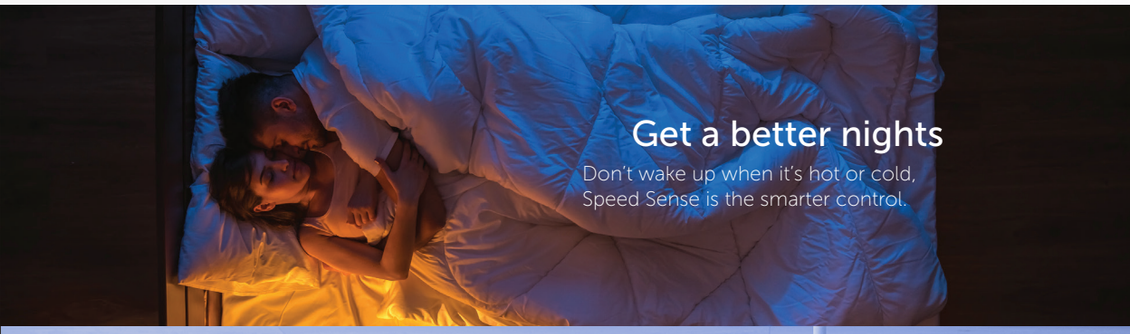


Appliances

Simply plug an appliance into a Lucci Powermesh power point and then name it using the Zimi app. The Google Assistant can switch individual appliances or everything in a room off and on with just one voice command.

Lighting

Not only can you turn different lights on and off, but you can also ask the Google Assistant to dim the lights to any brightness that you like. It's perfect for bedtime or when you're coming home at night.



Get a better nights

Don't wake up when it's hot or cold, Speed Sense is the smarter control.

Speed Sense technolo-

The fan controller is intelligent to sync speed with temperature. A little adjustment goes a long way to keep you comfortable.

- Senses the temperature
- Adjusts the speed
- Adjusts for Day & Night
- Potential energy saving

The double power point with super powers.

Simple automation with powerful technology to switch, monitor and manage appliances in your home. Life just got a whole lot easier.

Power monitoring

Understand the power usage of individual appliances with the actual cost of electricity.

Automatic schedules

Schedule your appliances to turn on or off automatically at a preset time.

Google Assistant

Just say "Hey Google" and you can control your appliances with hands-free convenience.

Power lock

Prevent power switches from being turned on. Safety and security with peace of mind.

Zimi app

Control and manage the power point features on your phone or tablet.

Track your energy costs.

Understanding your energy usage is the first step
in saving electricity and reducing costs.
Monitor your Lucci Powermesh products in real time.

Your electricity rate

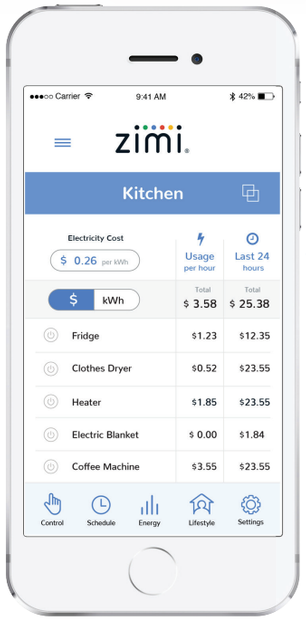
Enter your electricity provider's rate to show real operating costs.

Cost vs wattage

Monitor your energy usage in watts per hour or dollar cost.

Lighting & appliances

Track the usage of all your Powermesh products in each room of your home.



Compare usage

See the live power consumption or the total used for the day.

Total summary

Quickly see the total power cost or usage of everything together.

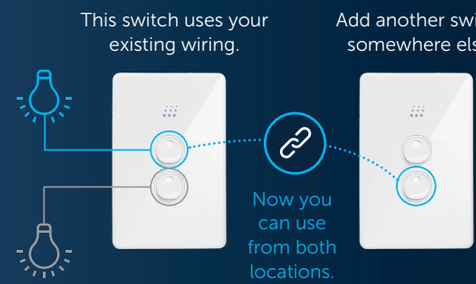
Did you turn it off?

Don't worry, you can easily turn off appliances when you're away from home. That's the peace of mind you get with your connected home.

Internet connection and Zimi Cloud Connect are required to control Lucci Powermesh products when away from home.

Behaviour Link

The extra switch you always wanted.



Power Lock

A simple feature that can lock power switches from accidentally being turned on. Safety and peace of mind for the whole family.

Lock or unlock each switch separately.

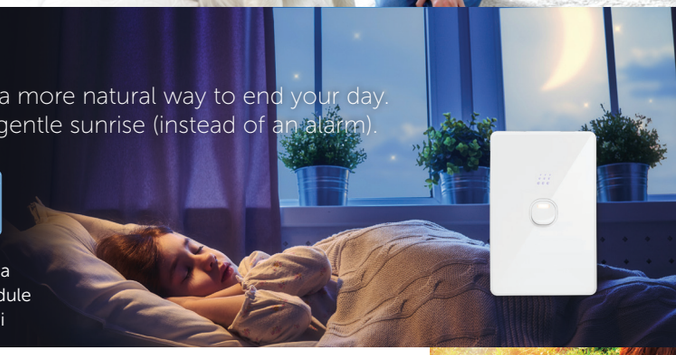
Good Night.

Fading the lights to off over time is a more natural way to end your day. Start your day with the feeling of a gentle sunrise (instead of an alarm).

Triple press to start a fade out

Set your own custom fade out time

Automate a regular schedule using Zimi



Anywhere. Anytime.

Whether you're at the local coffee shop, the beach or even the other side of the world, Zimi Cloud Connect lets you control your home via the internet. So even when you leave home, you're always connected.

zimi®

Lucci Powermesh products work with the Zimi home automation ecosystem.

Make your life easier, get connected today.
