## how to choose the right FAN FOR YOUR SPACE

All our fans fall into one of three categories based on their suitability for different locations. These categories are identified by these three symbols.

INDOOR ONLY

Suitable for indoor use only.

ALFRESCO OR INDOOR

Suitable for indoor and alfresco areas, provided the fan is undercover with a minimum of 2 walls. Fan must be positioned in a location protected from water, wind, dust and salt.

COASTAL

Suitable for indoor, alfresco and coastal areas, provided the fan is undercover with a minimum of 1 wall. Fan must be positioned in a location protected from water, wind and dust.

WANT MORE AIR FLOW FOR LESS?  
choose a **DC FAN**

Direct current (DC) powered ceiling fans use less energy yet provide high airflow, operate silently and cost just 1c per hour to run.\*

\*The calculations of costs and savings are approximates only and may vary according to use and size of fan and are based on an average electricity price of 0.28c per kWh.

1c PER HR TO RUN

DC = DIRECT CURRENT FAN

did you know?

WE OFFER **FIXED PRICES** ON FAN INSTALLATIONS

If you bought your ceiling fan from Beacon Lighting you're eligible for our fixed price installation service.

Simply head to your local store to organise your installation appointment with our preferred licensed electrician.

This service will be provided by a qualified Beacon Lighting preferred electrician. For full terms & conditions please visit [www.beaconlighting.com.au/ceiling-fan-installation-service](http://www.beaconlighting.com.au/ceiling-fan-installation-service).

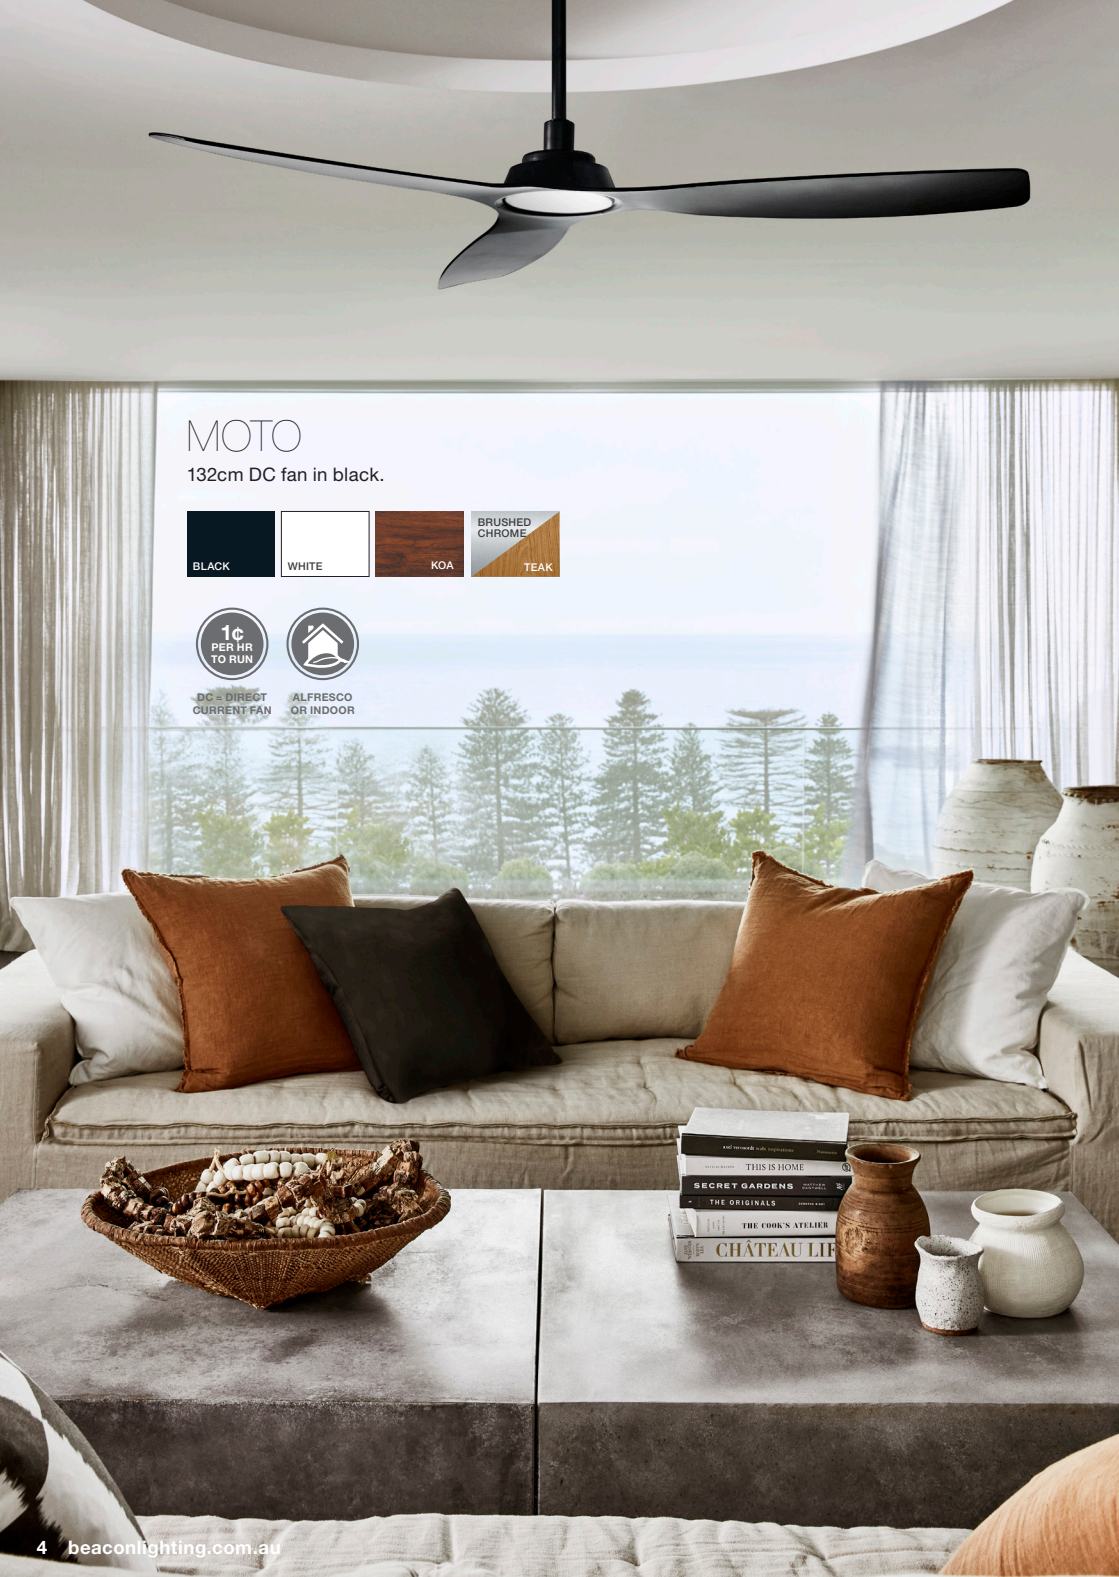

make your fan smart

MAKE AC FANS SMART WITH A LUCCI CONNECT **SMART REMOTE**

Using the Lucci Connect app, this smart remote will allow you to control your fan remotely from almost anywhere. You can turn your fan on/off and change the speed (3 speed) via the remote, your phone or voice commands with a smart home hub.
