DESCRIPTION

Festoon II 20 light 20m black light kit with coloured lights, 12V transformer included

The coloured globe (yellow/green/red/blue) Festoon lights are perfect for decorating entertaining areas and combine the traditional look of bulbs with LED technology for a stylish decorative lighting solution. The Festoon lights can be exposed to all weather elements however the driver is only IP44 so it will need to have weather protection. Being a DIY, this fitting would be great to use draped over bedheads and walls using decorative hooks to create an inviting glow to light up any room all year round. The 20 metres is the amount of cord that has the lights on them and comes with 4m of cord from the end of the lights to the driver. [Click here](#) for installation instructions.
