*Price and Product details are correct only at the time of printing.

Glamorous and refined, Davis features a beautiful frosted inner tube, surrounded by a highly reflective ribbed glass. Complete with a Tri Colour touch switch, which allows you to seek out a colour that works for you, no matter the time of day – simply tap to shuffle between Cool White, Warm White and Day Light. Dimming functionality has also been included. Hold the touch button to decrease or increase the brightness. Davis also has a memory function, so once you've set your favourite colour and preferred brightness level, you can use your wall switch to turn the fitting on or off, and it will always return to the previously stored setting. Davis can be positioned either horizontally above a mirror for general vanity lighting, or install vertically either side of the mirror for a more Hollywood effect. IP44 provides piece of mind when installing in wet areas, such as a bathroom. Product specifications are from the latest shipment of these products as LED production is constantly improving. Current stock may have different specifications to what is stated on the website. [Click here](#) for installation instructions
