

Docker Long Eyelid Ribbed Exterior in Aluminium

\$149.00

DESCRIPTION

The Docker Wall Bracket is a versatile design in that it can be used as both a wall bracket and a post light attachment. The Docker series will suit many homes from traditional to modern and are available in a clear or ribbed glass with a removable metal eyelid. When installed as a wall bracket, the eyelid shade will direct light downward to where it is best utilised, also maximising the light emitted from the globe choice. To make this light a path light, add our Docker 660mm post in either Brass or black and create the perfect light for driveways, paths, pool sides and lights in garden beds. IP65 rated and made of Aluminium, the Docker series is perfect for coastal applications.
