

Lucci Connect Exterior Flood Light With in Built Camera

\$299.00

DESCRIPTION

Feel safe whether you're at home or away with the Lucci Connect floodlight with camera. Its built-in camera has a 180-degree wide viewing angle and high quality full HD 1080p resolution to produce clear evidence in case of an incident. The built-in motion sensor can also detect motion up to 10 metres, so it won't miss a thing. You can view live footage on your smart device via the Lucci Connect app or choose to record footage with a removable MicroSD card* (not included). The two-way audio feature lets you speak through the camera with whoever is outside your home. This is handy when communicating with visitors, delivery crew, pets or for startling intruders. You can turn on/off the floodlight with voice commands via your smart speaker and dim the light as needed via the app. With the day/night mode, you can adjust the sensitivity of the sensor to avoid false motion detection especially at night. This floodlight camera has an IP44 weatherproof rating making it perfect for anywhere on the exterior of your home.

*Recommended to use a Class 10 MicroSD Card, up to 128GB MAX storage.

SPECIFICATIONS

SKU	240915
Dimmable	Yes
Globe Type	Integrated LED
Globe Quantity	0
Wattage Max	20W
Colour Temperature	Cool White
Kelvins	4000K
Lumens	1500
Efficacy	75
Suitability	Coastal
Material	ABS
Voltage	240V
Double Insulated	No
Height (mm)	250
Weight (kg)	1
