

Strix III 1.8m Curved Shade Only in Gloss Black

DESCRIPTION

Strix III 1.8m LED Linear Pendant Collection

The Strix III is a minimalist 1.8m linear LED pendant that combines sleek design with advanced technology. Available in matte black or white, it features built-in CCT technology for adjustable colour temperature and dimming capability to create the perfect ambience. Its clean, streamlined form is ideal for modern interiors, whether over an island bench, dining table, or workspace. Please note, the pendant and decorative shades are sold separately.

Customise your Strix III pendant with optional decorative shades to transform its look and suit a variety of styles. Curved shades in high-gloss piano black or white bring a modern retro vibe, while flat plated shades in aged brass, bronze, or brushed nickel provide a sleek metallic finish that complements tapware and hardware. For a natural aesthetic, choose the teak or walnut shades with an arched profile, which include additional end caps for enhanced customisation.

With its mix-and-match versatility and cutting-edge functionality, the Strix III linear pendant offers a seamless blend of style and innovation.

TIP: Pair the Strix III pendant with your choice of decorative shades to personalise your lighting—opt for timber for warmth, metallics for a modern edge, or high gloss for a bold retro statement.
