

Abacus 16 Light LED Colour-Shifting Multi Drop Pendant in Bronze with Sepia Glass

\$2,695.00

DESCRIPTION

The Abacus collection is an exquisite range that blends modernity with the timeless allure of varying-sized orbs of light, meticulously positioned to create a visually captivating display. Each piece in this collection is a testament to the harmony of light and architecture, designed to bring a touch of sophistication to any interior.

The Abacus 16lt Pendant presents a striking visual composition, featuring slender brass rods that descend from a central point, each one culminating in a lustrous configuration of opal glass balls. This pendant is a true statement of contemporary design, with its linear structure and cascading lights that mimic the form of a sophisticated, modern-day abacus.

Designed with lofty spaces in mind, this pendant is ideal for voids and areas with tall ceilings, where it can hang with poise and grandeur. Its vertical arrangement draws the eye upward, accentuating the height and volume of the space while providing a luminous focal point.

In a brass finish with opal glass, the Abacus 16lt Pendant casts a bright, even light that enhances clean, modern interiors, adding an airy and open ambience. For those who favour a touch of the past, the bronze finish with sepia glass shades offers a warm, nostalgic glow, reminiscent of the cherished mid-century style, perfect for creating a welcoming and intimate atmosphere.

The Abacus collection is integrated with energy-saving LEDs and includes Scene Control from the wall for greater flexibility, the Bronze with Sepia Glass design allows you to adjust the depth and warmth of the illumination. Adjusting the warmth is incredibly easy via a standard wall switch. Flick Off/On within 3 seconds to cycle through various depths of colour - from an incandescent 2500K up to a neutral white 3500K. This feature ensures that the Abacus collection is not just visually striking, but also technologically advanced, catering to your lighting needs with just a simple switch.
