

Horizon LED CCT Skylight in White

DESCRIPTION

The Horizon skylight brings the changing light of the sky into spaces where natural daylight can't reach. Engineered in Italy, its 45-degree Rayleigh scattering lens mimics the way sunlight filters through the atmosphere, creating the effect of real sunrise, daylight, and sunset.

With a wide colour temperature range from 1600K to 8000K and smooth dimming from 0.1% to 100%, the Horizon skylight shifts seamlessly from warm sunset hues to bright summer daylight. Controlled via remote, it offers a dynamic and immersive lighting experience tailored to any time of day.
