

Airfusion Climate II 50 DC Fan Only in Charcoal

\$495.00

DESCRIPTION

"

New technology DC (direct current) ceiling fan uses approximately 40% less electricity whilst producing the same airflow. The Climate II fan is slightly smaller than the Climate I at 50 inches (127cm) and has 3 acrylic blades. The acrylic blades are beneficial because warping of the blades is eliminated. This makes it a perfect fan for the more humid areas of Australia. The curve in the blades gives the Climate II a modern designer feel and the smaller DC motor size helps to complement the style as well. It comes in the same colours as the Climate 1 but has a new addition with the modern charcoal colour. The charcoal colour would be suited to homes with darker wood finishes and homes that have an industrial feel with large open spaces.
